

RISHABH TRIVEDI

Computer Engineering Student | MERN Stack Developer
Mumbai, India | +91 8356955719 | rtrivedi.data@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Computer Engineering student with hands-on experience in the MERN stack (MongoDB, Express.js, React.js, Node.js) and Python, gained through internship and academic project work. Solid foundation in REST API development, database design, and version control (Git/GitHub). Currently building additional skills in data analysis and AI/ML fundamentals, with the goal of applying full-stack development to data-driven systems.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+)

Web Development: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB, Database Integration, Schema Design

Tools: Git, GitHub, Version Control, Debugging

Currently Building: Python for Data Analysis (Pandas), SQL Querying, AI/ML Fundamentals

WORK EXPERIENCE

Python & MERN Stack Intern — Static.Int

June 2024 – July 2024

Mumbai, India

- Collaborated with a cross-functional team of 5+ developers to build full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Python.
- Built and deployed responsive web interfaces using HTML, CSS, and JavaScript, improving usability across devices.
- Integrated MongoDB databases with backend APIs to support CRUD operations and data storage/retrieval workflows.
- Developed and tested REST APIs, contributing to backend logic, debugging, and performance improvements.
- Used Git and GitHub for version control, code review, and collaborative development within the team.

PROJECTS

Persian Darbar — Online Restaurant Reservation System

- Built a full-stack web application enabling users to book restaurant tables by date, time, and guest count.
- Designed and implemented a relational database schema to store and manage reservation data reliably.
- Developed the front end using HTML, CSS, and JavaScript, and connected it to backend logic for real-time booking updates.
- Streamlined the end-to-end booking workflow, reducing manual steps in the reservation process.

VedAI — AI-Based Assistance System (Final Year Project)

- Building an AI-based assistant to process user queries and generate automated responses.
- Applying foundational AI/ML concepts in Python to model basic user intent.
- Exploring how interaction data can be used to refine the system's response logic.
- Ongoing final-year project demonstrating practical use of AI for intelligent automation.

EDUCATION

Thakur College of Engineering & Technology (TCET)

2025 – Present

B.E. in Computer Engineering (Pursuing)

Thakur Polytechnic

2022 – 2025

Diploma in Information Technology — CGPA: 9.5 / 10

St. Francis D'Assisi High School

2022

SSC — 91.40%

CERTIFICATIONS

- Advanced Java Programming — Scholarhat
- Basic Java and OOPs — Scholarhat
- Python Programming Fundamentals

LANGUAGES

English, Hindi, Marathi, French
